

Welcome to QIT Company!

ERP SYSTEMS

Brochure

CUSTOM ERP / ODOO

Enterprise resource planning solutions that connect your teams, automate workflows and bring your business into one system.

Built around your business.

From a purpose-built platform to an Odoo implementation, we help you choose the right approach for your processes, people and growth.

01 CUSTOM ERP

Designed and developed from the ground up around your operations, approvals and reporting needs.

- Tailored workflows
- Purpose-built modules
- Flexible integrations

02 ODOO SOLUTIONS

Implementation and customization of Odoo to connect your key departments in a modular business platform.

- App configuration
- Workflow customization
- Integration and migration

At QIT Company

We align the solution with your goals, day-to-day needs and budget.

Our ERP services include

- Custom ERP development
- Odoo implementation
- Integration and data migration
- Reporting and dashboards
- Training and ongoing support

Our team

Our developers work with your team to turn daily business processes into practical, connected solutions.

WE OFFER

Practical ERP services to connect information, reduce repetitive work and give your team a clearer view of the business.

1. Custom ERP systems

We build modules, workflows and approval processes around the way your business operates, with the interfaces and reporting you need.

2. Odoo solutions

We implement and configure Odoo, adapt workflows and develop custom modules to match your operational requirements.

3. Integration and migration

We connect your ERP with existing tools and move essential business data through a planned, validated migration process.

4. Reporting and dashboards

We organize operational information into useful reports and dashboards, helping teams monitor performance and make informed decisions.

5. Training and support

We prepare your users for daily operations and provide ongoing maintenance, troubleshooting and improvements as your needs evolve.

OUR PROCESS

A clear path from requirements to day-to-day operations.

A collaborative, phased approach keeps your team involved at every step.

1. Discovery and planning

We review your processes, priorities and current tools, then agree on the project scope, milestones and implementation approach.

2. Solution design

We map workflows, roles and data, and define the modules and integrations for a custom ERP or Odoo-based solution.

3. Build and configuration

We develop custom functionality or configure and extend Odoo, with regular reviews to keep the solution aligned with your needs.

4. Testing and training

We validate key workflows and migrated data, resolve issues and train your users before the system goes live.

5. Launch and ongoing support

We plan the rollout with your team, support adoption and continue to maintain and improve the system after launch.

Built with your team. Supported for the long term.

THANK YOU for Choosing QIT Company!

Thank you for considering QIT Company for your ERP systems.

One business. Connected operations.

Whether you need a system built from scratch or an Odoo solution adapted to your business, we are ready to help you take the next step.

Let's plan your ERP journey.

Tell us about your workflows, challenges and goals.
